PRODUCTS SELECTION

Movex[®]
www.movexii.com

Made in ITALY PERFORMING everywhere.

Company Headquarters
Castelli calepio (BG) - ITALY

Movex® is a dynamic company driven by the ambition to design and manufacture conveying and material handling technology of the highest quality. We combine superior technical performance and design to provide customers with innovative solutions and impeccable service.

At our Italian headquarters, we design and manufacture standard and customized products and solutions to meet customers' needs in a dynamic and proactive environment.

Movex® follows every single customer from the project to installation, guaranteeing full support. With more than 30 technical sales representatives worldwide, we offer global support directly on-site, via video conference or by phone. Thanks to worldwide warehousing, we are able to provide short lead times and, in the event of the need for faster delivery times, our Priority Service, offering delivery in 1/2 working days, is always available.

As a leader in beverage and logistics conveyor components, Movex® stands as a robust entity in the industry with over 15 years of dynamic presence, ensuring quality products and impeccable service.

MISSION

To forge our values through the development of ideas and high standards, and to professionally support our partners with flexibility and efficiency.

VISION

To achieving strong market leadership, while constantly remaining up to date. To plan our future while remaining faithful to our history and values.

Movex Blueline®

PRODUCTS SELECTION

After years of successful activity in the beverage sector, **Movex®** has expanded its expertise by developing a selection of products aimed at intercepting and meeting the needs of new sectors, such as the food, meat, poultry, seafood, bakery, vegetable, material handling, and automotive industries. This new chapter in our company's history is called **Blueline®**.

With **Blueline®**, we are committed to offering the same excellence and reliability that our customers have come to know and expect from us.

We are determined to ensure that every product we bring to market carries our distinctive brand of quality and reliability, supported by an unwavering commitment to innovation and excellence.

This catalog contains only Modular belts and related sprockets, to find out the complete **Blueline®** selection, please visit our website or contact your sales representative.

Stronger, together.

Since 1972, trusted experts in plastic modular belts for food and industrial conveying.

Discover more on www.eurobelt.com

In September 2025, Movex Group officially announced the integration of Eurobelt S.A., Spain's leader in modular plastic belts, into its industrial and commercial structure.

A strategic step in Movex Group's global expansion, this integration is more than an industrial move: it's a shared opportunity.

For our customers, it means more high-quality solutions, deeper expertise, and even closer support.

MDX METAL DETECTABLE X-RAY MATERIAL

To meet the needs of a constantly evolving market of quality control processes within the food and packaging industries — Movex has developed **MDX**, a thermoplastic material based on POM with a compound specifically formulated to be detectable by X-ray systems.

The **MDX** formulation maintains the mechanical performance of standard POM — such as high stiffness, dimensional stability, and wear resistance — while adding the key feature of X-ray detectability, allowing for quick identification and removal of any accidental fragments along the production line, including broken belt particles. **MDX** offers an effective and versatile solution to minimize contamination risks and ensure compliance with major international food safety standards, including BRC, IFS, FDA, and HACCP.

Key Features and Benefits (compared to POM material)

- Optimal X-ray detectability
- Improved detection efficiency in food processing environments
- Developed to further reduce the risk of contamination
- Suitable for direct food contact in compliance with FDA & EU regulations.

The entire Movex Blueline belt series is available in MDX material upon request.

PKX POLYKETONE BELT MATERIAL

PKX is a Movex material specifically developed for primary red meat processing applications and their unique requirements. Its outstanding durability and easy-to-clean properties make it the perfect solution for this type of conveyor system.

PKX reduces non-mechanical belt breakage and the risk of foreign material contamination. Designed for direct food contact applications, **PKX** is a robust, high-performance material that outperforms POM in resistance to impacts, chemicals, and abrasion. **PKX** excels in the harsh conditions of food processing, including belt removal/reinstallation, conveyor design challenges, and chemical exposure during processing and sanitation. This superior material significantly reduces the risk of non mechanical foreign material contamination from the belt in your facility.

Key Features and Benefits (compared to POM material)

- Greater resistance to acidic and basic substance
- No food contamination, no plastic parts from scratch
- Three times higher impact resistance at 4°C
- Improved product release and wear resistance
- 12% lighter but same belt pull & working load capacity
- Compliant with FDA and EU regulations

Available stock series 7010 MTW, 7010 FT & 7510 FT white; other series on request.

Specks and color swirls may occur in PKX and MDX belting but do not affect performance.

***Belts wider than standard are available with 50 mm increments.**
Non-standard widths are available with 16.65 mm increments.

The nominal tensile strength and the nominal width tolerance are valid for a temperature of 23°C (73 °F).

The actual belt width may differ from the nominal value depending on the material used, with the following percentage tolerances: For PE belts, the variation ranges from -0.5% to +1%. For POM belts, the variation ranges from 0% to -0.5%. For PP belts, the variation ranges from -0.5% to +0.5%.

Non-Standard belt widths are incremented by 16.65 mm (0.66"). The minimum width is 50 mm (2").

Non-bricklaid belts are available in widths of 50 mm (2"), 100 mm (4") and 200 mm (8").

Temp. dry: -40+93 °C	Temp. dry: +5+93 °C
Specks and color swirls may occur in PKX belting but do not affect performance.	

Why choose our PKX?

For primary red meat processing applications, where durability and easy cleaning are essential, Movex **PKX** is the ideal choice. Its composition reduces non-mechanical belt breakage and minimizes the risk of foreign material contamination.

Key Features and Benefits:

- Excellent resistance to acidic and basic substances.
- No food contamination or plastic fragments from scratches.
- Three times higher impact resistance at 4°C.
- Improved product release and wear resistance.
- Same pull and working load capacity as POM, but 12% lighter.

*Special widths are available with 9.375 mm increments.

Please ask wider width option to customer service.

The nominal tensile strength and the nominal width tolerance are valid for a temperature of 23°C (73 °F).

The actual belt width may differ from the nominal value depending on the material used, with the following percentage tolerances: For POM belts, the variation ranges from 0% to -0.5%. For PKX belts, the variation ranges from 0% to -0.5%.

Non-Standard belt widths are incremented by 18.75 mm (0.74"). The minimum width is 37.5 mm (1.5"). Non-bricklaid belts are available in widths of 75 mm (3"), 150 mm (6"), 300 (12") and 600 mm (24").

*Belts wider than standard are available with 75 mm increments.
Non-standard widths are available with 18.75 mm increments.

The nominal tensile strength and the nominal width tolerance are valid for a temperature of 23°C (73 °F).

The actual belt width may differ from the nominal value depending on the material used, with the following percentage tolerances: For PE belts, the variation ranges from -0.5% to +1%. For POM belts, the variation ranges from 0% to -0.5%. For PP belts, the variation ranges from -0.5% to +0.5%.

Non-Standard belt widths are incremented by 18.75 mm (0.74"). The minimum width is 37.5 mm (1.5"). Non-bricklaid belts are available in widths of 75 mm (3"), 150 mm (6"), 300 (12") and 600 mm (24").

Movex® Zero Contact™ modular fixed radius curve belt is the best choice for all type of transportation, for beverage, food and logistic industries, thanks to its versatility.

It offers high performances, reducing the coefficient of friction between product and running belt surface and improves the efficiency of the line, by minimizing downtimes.

A wide range of radii and widths helps finding the right solution for every product dimension and transportation condition, from light packages to heavier ones.

Installation and maintenance have never been so easy, so far.

The belt is compliant to: • Regulation: D.P.R. 777 - 23 August 1982 e D.L. 108 - 25 January 1992; • UNI EN 1186 1÷15:2003

• D.M. 34 del 21.3.73 S.O. GU n° 104 - 20/04/73 and following updates • Regulation (EU) n. 10/2011, GUUE L 12 del 15/01/2011 and following updates.
• Regulations (CE) n. 1935/2004 GUCE L 338 del 13/11/04 and n. 1895/2005 GUCE L 302 - 19/11/2005.

The gap between the belts is 6 mm. | Track 1 belt is supplied without bearings. | Track 2 belt is supplied with bearings.

The innovative design of **Movex® Zero Contact™ PRO** is recommended for high speed, heavy loads and transportation of abrasive substances, like sand, salt, sugar, and many other applications.

The stainless steel pins guarantee a higher working load and due to the new pin retention with grub screw, the assembly of this belt is 100% secure.

The robust structure of **Zero Contact™ PRO** can be summarized in minimal maintenance, long life expectation and high reliability.

Zero Contact™ PRO is a versatile belt, allowing a wider range of available widths and radii. Find out also our “two-tracks” version.

What is the S dimension?

It defines the distance between sprocket/idler (=shaft) center and top of wear strip. It ensures smooth run of the chain at minimum noise level.

The value is specified for each type and size of sprocket in the tables on the following pages of the chapter. For bore tolerance refers to Movex engineering manual available on our website.

This catalog contains only a limited selection of all the products available at Movex S.p.A.
For a complete overview, please visit our website or contact your sales representative.

The Entire BLUELINE RANGE.

Movex® Blueline is more than just modular belts and sprockets. It is a complete range of components designed to meet the needs of modern conveying systems.

From a wide variety of extruded profiles to leveling feet, from support bearings to technical conveyor components, all the way to our Movex modular solutions—plug-and-play units: an ecosystem of products engineered to ensure efficiency, reliability, and seamless integration within industrial systems.

With Movex® Blueline, every element works together to deliver complete solutions for industrial conveying.
