

Roller Conveyor Scraper Tool

Keep Your Roller Conveyors Turning

Adhesive buildup on roller conveyors starts small but escalates fast. As shipping labels and sticker residue accumulate, rollers lose speed, packages get stuck, and the ripple effect disrupts throughput across your entire operation. Traditional flat blade scrapers only contact a fraction of the roller surface, forcing maintenance teams to make multiple passes, spend more time than necessary on routine cleaning, and pose the risk of damage to the rollers.

The Roller Conveyor Scraper Tool (RCST) takes a smarter approach. Engineered specifically for roller conveyor maintenance, it features a contoured blade that conforms to the outside curvature of the roller, removing significantly more buildup in a single pass. Replaceable blades extend tool life, and a standard thread pattern allows mounting to any paint roller extension pole for easy reach without excessive bending or climbing. Reduce maintenance time and keep packages moving with Flexco's Roller Conveyor Scraper Tool.

*Quick and easy **blade replacement** minimizes downtime*

***Textured handle** provides a secure and comfortable grip*

***Built in storage** keeps spare blades readily available*

*Removable **blade storage cap** for easy access to spare blades*

RCST

Roller Conveyor Scraper Tool

Replaceable aluminum blades clean without scratching rollers

Blade cover promotes safety while allowing the blade to remain in place

Standard thread pattern allows attachment to common broom handles for extended reach

Features and Benefits:

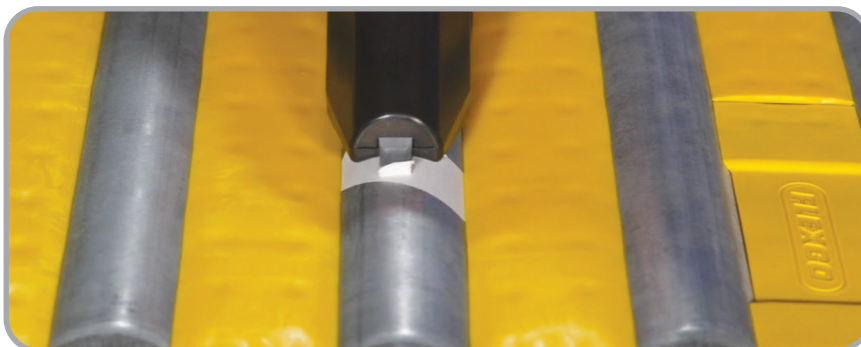

- **Contoured Blade Design** – Curved profile matches 1.9" roller geometry for maximum surface contact and cleaning efficiency
- **Single-Pass Performance** – Removes more adhesive and sticker buildup per stroke compared to flat scrapers and traditional methods
- **Replaceable Blades** – Swap worn blades quickly to maintain consistent scraping performance and extend tool life
- **Extension Pole Compatible** – Mounts to standard paint roller poles via common thread pattern for convenient reach across wide conveyor sections
- **Reduced Physical Strain** – Eliminates excessive bending and reaching, making routine maintenance easier on your team

Ordering Information

Roller Conveyor Scraper Tool Ordering Information

Description	Ordering Number	Item Code
RCST Roller Conveyor Scraper Tool	RC-SCRAPER-TOOL	314400
Roller Conveyor Scraper Tool 5 pack	RCST-TOOL-5	314425
Roller Conveyor Scraper Tool 25 pack	RCST-TOOL-25	314426
Replacement Parts		
Replacement Blade 10 Pack	RCST-BLADE-10	314401
Replacement Blade 50 Pack	RCST-BLADE-50	314402
RCST Body Replacement Parts Kit	RCST-BODY-REPL	314403
RCST Handle Replacement Parts Kit	RCST-HANDLE-REPL	314404

NOTE: Tool kits and bulk packs come with 10 blades per tool.

Cleans rollers without needing to remove Roller Conveyor Transfer Plates (RCTP).
